1\* A small blank space.

2\* Arranged thus: 1.

3\* Arranged thus: 1.

4\* Probably an omission due
to homocoteleuton, but the
lacuna measures 2½ sq. only.

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |

1\* L was added later.

2\* It is impossible to tell where
the text of BIC really ended; it
may have contained the complete
spell in small and crowded
writing.

3\* L.

4\* L, a corruption of L.

5\* Doubtful: \_\_\_\_.

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           | 0β4900000000000000000000000000000000000 |

A STA 4\*

120 45 d

follows.

1\*End of col. and section.

2\*There is no room for

a \( \text{a} \).

3\* \( \frac{1}{2} \), see \( \text{p. 402, n. 1\*} \).

4\* 415 \( \text{c precedes.} \)

5\* 415 \( \text{precedes.} \)

6\*1/1/1/1/1/1, the traces do not suit \( \frac{1}{2} \); \( \text{seems probable,} \)

but \( \frac{1}{2} \) does not fill the lacuna.

7\* Arranged thus: \( \frac{1}{2} \).
